Low - Code Developer - Internship

Who are we:

Raptee.HV is a full-stack electric motorcycle startup with a strong technical foundation. Founded in 2019 by four engineers from Chennai (with backgrounds at Tesla and Wipro), Raptee Energy aims to revolutionize the EV market by offering a high-performance motorcycle alternative to the existing scooter-dominated options. The company is incubated at CIIC & ARAI.

Role Overview

We are looking for a passionate and motivated Low - code Developer to join our development team. As a Professional Zoho Developer, you will work closely with our experienced engineers, contributing to the development of innovative applications and systems using Creator and Deluge. This position offers a unique opportunity to enhance your skills in application development, app integrations, and low-code platforms. Zoho certification is a plus but not mandatory.

What You'll Do:

- Collaborate with the development team to design, develop, and maintain applications using Zoho Creator.
- Write clean, efficient, and maintainable code using Deluge.
- Implement and work with Zoho apps and their integrations.
- Perform app integrations to enhance system functionality and interoperability.
- Participate in code reviews, testing, and debugging processes.
- Contribute to the development of technical documentation and reports.
- Engage in continuous learning and stay updated with the latest low-code platform trends and technologies.
- Understand and configure open-source technologies as needed.

Who Can Apply?

- Strong development skills in Zoho Creator and Deluge.
- Experience with Zoho app integrations.
- Familiarity with web development technologies (HTML, CSS, JavaScript).
- Knowledge of version control systems like Git.
- Ability to understand and configure open-source technologies.
- Understanding of low-code platforms.
- Professional Coding abilities in languages such as JavaScript, Python, Java, or C++.

Preferred Skills (Not Mandatory)

- Zoho certification.
- Understanding of front-end frameworks and libraries (e.g., React, Angular, Vue.js).
- Familiarity with database management systems (SQL/NoSQL).
- Exposure to cloud platforms and services (e.g., AWS, Azure, Google Cloud).

Qualifications

- Currently pursuing a degree in Computer Science, Software Engineering, or a related field.
- Strong analytical and problem-solving skills.
- Excellent communication and teamwork abilities.
- Eagerness to learn and adapt in a fast-paced environment.

What's In It for You:

- Opportunity to work in a fast-paced and dynamic environment.
- Opportunities for professional growth and advancement.
- A culture that fosters collaboration and creativity within the team.
- Collaboration with seasoned experts in the field.
